ACADEMICS

University of Texas, Dallas — Senior 3.9 GPA

Graduates Dec 2026

- Computer Science & Business; Specialization in Artificial Intelligence; Dean's List and Academic Excellence

EXPERIENCES

Neo Accounting Firm — Software Engineer

Jun 2024 - Aug 2025

- AI Integration** - Integrated AI workflows with automated **text recognition** and **tool-calling**, leveraging structured outputs and external context from **MCP servers** while ensuring safety against prompt injection.
- Linux/Bash** - Managed servers for critical financial systems. Employed Infrastructure-as-Code (IaC) scripting using Bash and Windows PowerShell for file management, automation, and security hardening.
- Cloud (AWS/Azure)** - Engineered scalable and cost-optimized cloud infrastructure, maintaining 99% uptime.
- SQL Database** - Normalized, stored, and queried data using SQLite and later MySQL in a designed schema.

Nebula Labs — Web Developer

Oct 2023 - May 2024

- Enterprise Codebase** - Worked in professional teams on a scalable **Vite** codebase using **Agile/SCRUM** workflows. Enforced code quality with linting and testing, and collaborated using GitHub and Confluence.
- React (JS/TS)** - Developed server-side rendered React with type-checking using TypeScript or JavaScript JSDocs.
- Flask/Django** - Built RESTful APIs with backend frameworks, database integration, and user authentication.
- Electron Desktop App** - Used CI/CD pipelines to build cross-platform applications for Mac, Windows, and Linux.

PROJECTS

University AI Research — Researcher and Developer

Nov 2024 - Present

- TensorFlow/PyTorch** - Fine-tuned deep-learning models to achieve state-of-the-art performance in specialized fields, leveraging quantization and other optimization techniques to improve model efficiency.
- Agentic Systems & Tool-Calling** - Researched the ability of agentic systems to utilize tool-calling during chain-of-thought prompting to improve reasoning, planning, and execution in specialized tasks.
- Computer Vision** - Leveraged OpenCV for image analysis, feature extraction, and object detection.

Java Game Development — Product Manager

Aug 2023 - Nov 2024

- Java/Kotlin** - Developed networked applications in IntelliJ, with custom client-server protocols to support multiplayer using OOP and composition paradigm, achieving thousands of users and downloads.
- Gradle** - Developed a full enterprise-level codebase with Gradle build tools, scripts, caching, and plugins.
- GitHub Workflows** - Configured GitHub Actions workflows to automatically build and package JAR artifacts.

US Air Force Computer Competition — Washington DC Finals

Aug 2022 - Mar 2023

- Cybersecurity** - Secured Cisco, Ubuntu, and Windows using Active Directory, PowerShell, and Registry Editor.
- National Top 10** - Ranked top 10 of 4000+ in the CyberPatriot Competition; National Finals in Washington, DC.
- Powershell** - Developed scripts for vulnerability scanning; detected 92% of threats during the competition.

SKILLS

Languages

JavaScript • TypeScript • C++ • Java • Swift • C# • Python • SQL • Go • Bash • HTML/CSS

Ecosystems

Node • Express • React • Next • Flask • Django • Tailwind • Git • .NET • TensorFlow/PyTorch

Other Skills

Figma • Adobe Creative Suite • Audiovisual Editing • Microsoft Office • Fluent in Chinese
