ACADEMICS

University of Texas, Dallas — AI Researcher, 3.9 GPA

Graduates Dec 2026

- B.S./M.S. Accelerated CS Program, Minor in Business; Dean's List; Researcher at the Center for Applied AI.
- **AI Research Papers** - Authored papers on multi-agent architecture, prompt engineering, and agentic reasoning.
- **PyTorch/TensorFlow** - Developed models that can achieve state-of-the-art performance in specialized fields.
- **Agentic Systems & Tool-Calling** - Researched the ability of agentic systems to utilize tool-calling during chain-of-thought prompting to improve reasoning, planning, and execution in specialized tasks.
- **Computer Vision** - Leveraged OpenCV for image analysis, feature extraction, and object detection.

EXPERIENCES

Emerson Electric — App Developer

Jan 2026 - Present

- **Enterprise Codebase** - Worked in professional teams on a scalable **Monorepo** codebase using Vite and Turborepo. Spearheaded development within an **Agile/Scrum** environment with GitHub and Confluence.
- **React/React Native** - Developed enterprise TypeScript applications using React Hooks and Context API for state management. Integrated GraphQL and RESTful APIs while ensuring code quality through linting and testing.
- **Mobile/Desktop App** - Used CI/CD pipelines to build cross-platform applications for both iOS/Android mobile apps using **Expo**, and Mac/Windows/Linux desktop apps using **Electron**, increasing efficiency by 50%.

Neo Accounting Firm — Software Engineer

Jun 2024 - Aug 2025

- **AI Integration** - Integrated AI agents with automated **text recognition** and **tool-calling**, leveraging structured outputs and external context from **MCP servers** while ensuring safety against prompt injection.
- **Linux/Bash** - Managed servers for critical financial systems. Employed Infrastructure-as-Code (IaC) scripting using Bash and Windows PowerShell for file management, automation, and security hardening.
- **Cloud (AWS/Azure)** - Engineered scalable and cost-optimized cloud infrastructure, maintaining 99% uptime.
- **SQL Database** - Normalized, stored, and queried data using SQLite and later MySQL in a designed schema.

PROJECTS

Java Game Development — Product Manager

Aug 2023 - Nov 2024

- **Java/Kotlin** - Developed networked applications in IntelliJ, with custom client-server protocols to support multiplayer using OOP and composition paradigm, achieving thousands of users and downloads.
- **Gradle** - Developed a full enterprise-level codebase with Gradle build tools, scripts, caching, and plugins.
- **GitHub Workflows** - Configured GitHub Actions workflows to automatically build and package JAR artifacts.

US Air Force Computer Competition — Washington DC Finals

Aug 2022 - Mar 2023

- **Cybersecurity** - Secured Cisco, Ubuntu, and Windows using Active Directory, PowerShell, and Registry Editor.
- **National Top 10** - Ranked top 10 of 4000+ in the CyberPatriot Competition; National Finals in Washington, DC.
- **PowerShell** - Developed scripts for vulnerability scanning; detected 92% of threats during the competition.

SKILLS

Languages

JavaScript • TypeScript • C++ • Java • Python • Swift • SQL • Go • Bash • HTML/CSS

Ecosystems

Node • Express • React • Next • Flask • Django • Tailwind • Git • .NET • TensorFlow/PyTorch

Other Skills

Figma • Adobe Creative Suite • Audiovisual Editing • Microsoft Office • Fluent in Chinese
